

Canola 101..

- ✓ A crop grown along the Wheatbelt.
- ✓ Mostly sown as winter crop.
- ✓ Susceptible to over 40 insect pests.
 - Acari (redlegged earth mites)
 - Coleoptera (false wireworms)
 - Collembola (lucerne fleas)
 - Lepidoptera (diamondback moths)

Our objectives..

- ✓ Customise sampling techniques for parasitoids in cropping fields.
- ✓ Understand parasitoid - non-crop plant - aphid host interactions.
- ✓ Study plant host switching behaviour of parasitoids.

#@precious_wasps Thank you!

Wasp Watch: What's your flavour?

Come find me,
let's chat:

Appreciation:
